

Custom GPT Use Case Document

GPT Name

AI Learning Coach

Target Users

Students and beginners learning Artificial Intelligence, Machine Learning, Prompt Engineering and AI Agents.

Problem Statement

Many learners struggle to find structured learning paths and often get overwhelmed by scattered tutorials, articles and videos. They also lack personalized guidance and feedback while studying.

Why a Custom GPT?

A Custom GPT can be trained with curated learning resources, study plans and practice exercises. It can answer questions, generate quizzes, explain difficult concepts and adapt explanations based on the learner's skill level.

Expected Outcomes

- Personalized learning experience
- Faster understanding of AI concepts
- Automated quiz generation and feedback
- Consistent study guidance
- Improved learner engagement and retention

Feasibility

The GPT can be built using uploaded study materials, predefined instructions, and conversation-based learning support without requiring complex software development.
