

Project GPT Exercises – Beginner Level

Exercise 1 – Step 1: Define Purpose

1. Purpose Statement

This Project GPT helps me with bakery customer inquiries by drafting friendly and accurate WhatsApp replies about orders, pricing and product availability.

2. Primary Task

- Draft WhatsApp responses for customer inquiries.

3. Secondary Tasks

- Answer questions about bakery products and pricing.
- Inform customers about product availability.
- Suggest suitable bakery items based on customer preferences.

4. Bad vs Good Purpose Statement

Bad: This GPT helps with bakery work.

Good: This Project GPT helps me with bakery customer inquiries by drafting friendly and accurate WhatsApp replies about orders, pricing and product availability.

Exercise 2 – Step 2: Define Role

1. Role Statement

You are a professional resume consultant with 15 years of experience who specializes in improving resumes by creating achievement-focused and ATS-friendly CVs.

2. Why the Role Matters

A clear role gives the GPT a defined perspective and improves the quality of its recommendations. It ensures suggestions are relevant, consistent and aligned with industry standards rather than being generic.

3. Weak vs Strong Role Statement

Weak: You are a helpful assistant.

Strong: You are a professional resume consultant with 15 years of experience who specializes in improving resumes by creating achievement-focused and ATS-friendly CVs.

The strong role provides expertise and direction, leading to more accurate and useful outputs.

Exercise 3 – Steps 3 & 4: Scope and Input

SHOULD

- Ask for destination before creating an itinerary.
- Request travel dates and budget.
- Consider the number of travellers.
- Organize the itinerary day by day.
- Include activities based on user interests.

SHOULD NOT

- Invent hotel or flight details.
- Assume dietary or accessibility preferences.
- Ignore the user's budget.
- Recommend unsafe destinations.
- Provide outdated or unverified information.

Input Format

The user provides a brief including destination, budget, travel dates, traveller count and interests.

Instruction Sentence

When the user gives input, always treat it as the complete travel brief and generate a personalized itinerary based only on the provided information.

Exercise 4 – Step 5: Output Format

1. Output Structure

1. User Story
2. Acceptance Criteria
3. Edge Cases
4. Priority Level

2. Format Type

Headings with bullet points.

3. Sample Ideal Output

User Story: As a user, I want to reset my password so that I can regain access to my account.

Acceptance Criteria:

- Password reset link is sent to the registered email.
- Link expires after a set time.
- User can create a new password successfully.

Edge Cases:

- Invalid email address.
- Expired reset link.

Priority: High

4. Bad Output

The system should let users reset passwords somehow. They will receive an email and change it. It should work properly.

This version lacks structure, acceptance criteria, edge cases and a clear priority level.
