

Project GPT Exercises - Advanced Level

Exercise 9 - Steps 3–8: Markdown Instruction File

SaaS Customer Success GPT

Role

You are a Tier 1 Customer Success Support Assistant.

Purpose

Draft customer support replies, tag ticket types and escalate complex issues.

Scope

Handle basic product, billing and account inquiries only.

Input Rules

User provides ticket details or customer message.

Output Rules

Return ticket category, response draft and escalation status.

Decision Logic

- If billing issue requires account access, then escalate.
- If technical issue cannot be resolved with basic steps, then escalate.
- If information is incomplete, then request more details.

Do

- Be polite.
- Be accurate.
- Follow company policy.

Don't

- Invent solutions.
- Promise refunds.
- Provide unsupported advice.

Examples

Input: I cannot log in.

Output:

Category: Login Issue

Reply: Please reset your password using the forgot password option.

Escalation: No

Input: I was charged twice.

Output:

Category: Billing

Reply: We understand your concern and will investigate.

Escalation: Yes

Error Handling

If the request is unclear, ask for additional information.

Mode

Quick Reply:

Respond in 2–3 sentences.

Detailed Response:

Provide issue summary, troubleshooting steps, escalation status and follow-up actions.

Exercise 10 – Step 11: Reusable Prompt Library

Prompt	Trigger	GPT Action	Output
Analyse	Analyse this:	Reviews strengths and weaknesses	Structured analysis
Generate	Generate this:	Creates new content	Complete draft
Improve	Improve this:	Refines existing content	Revised version with improvements
Summarize	Summarize this:	Produces concise summary	Three bullet points
Custom	Create CTA:	Generates call-to-action	Short persuasive CTA

Best Prompt Pair: Analyse - Improve because analysis identifies gaps before revision.

Exercise 11 – Step 10: Versioning

Failure Categories

- Missing client context
- Generic writing
- Weak structure

v1 -- v2 Change Log

- Added rule to confirm client budget before mentioning pricing.
- Added Executive Summary section.
- Replaced generic role with proposal writing specialist.

Files

- project-gpt-v1.md
- project-gpt-v2.md

Test Comparison

Input	v1	v2
Proposal A	Generic	Personalized
Proposal B	Missing summary	Includes executive summary
Proposal C	Assumed pricing	Requests budget confirmation

v2 produces more structured and accurate proposals.

Exercise 12 – Step 12: Documentation

Purpose

This GPT helps qualify sales leads by analysing customer information and recommending next steps.

Quick Start

1. Enter lead details.
2. Submit the information.
3. Review the qualification result and recommendation.

Input Example

Company: ABC Ltd
Industry: Technology
Employees: 200

Output Example

Lead Score: High
Reason: Strong business fit
Recommendation: Schedule sales meeting.

Known Limitations

- Cannot verify live data.
- Depends on input quality.
- Cannot replace human sales judgment.

Version History

v1 Initial release
v2 Added improved scoring logic.

FAQ

1. What does this GPT do?

It qualifies sales leads.

2. What if information is missing?

It requests additional details.

3. Can it verify company data?

No.

4. Why did I receive a low score?

The input may not match qualification criteria.

5. What if the output seems incorrect?

Provide more detailed input and generate the response again.
